Description

The BASIC cup brush for the angle grinder can be used universally for machining large steel surfaces. The use of brassed steel wire SM prevents corrosion. This product is suitable for removing rust, paint and lacquer as well as for surface preparation and finishing of steel. In addition, the tool can be used for cleaning welding seams. The wire brushes are available in different specifications to cover all your needs from delicate (DW) to coarse (DZ).

Features

- + Universal tool with good brush life
- + Hardened steel wire SH for additional brush life
- + Brass-plated steel wire SM prevents corrosion

Applications

- + Twisted wire DZ for heavy work, severe contamination and for removing paint and lacquer
- + Cup brushes for grinding large surfaces
