Description

The BASIC cut-off wheel for the petrol saw is a universal tool for cutting large steel cross-sections. Whether you're a professional or a do-it-yourselfer, this cut-off wheel has the potential to become your new favorite tool. This cost-effective cut-off tool makes their job easier while delivering reliable results. With its rugged construction and easy cutting ability, this cut-off wheel is perfect for work around the house or on the job site.

Features

- + The product offers shortened cutting times with minimal exertion
- + Good lifetime and stability
- + Also suitable for powerful (over 5 kW) stationary machines

Applications

- + For machining steel
- + For cutting profiles, solid material and large cross-sections
- + Developed for use on manual cut-off machines with electric or petrol engines
