Description

This aggressive BASIC grinding wheel for stone offers you fast and comfortable work without great exertion. Due to the use of silicon carbide in the wheel structure, this tool is especially suitable for soft to hard stone and short-chipping materials as well as natural and engineered stone and concrete.

Features

- + Fast and convenient work with minimal exertion
- + Silicon carbide makes it especially suitable for stone and short-chipping materials
- + Enhanced comfort while working

Applications

- + For edge and surface grinding on all stone hardnesses, natural and artificial stone as well as concrete
