Description

The BASIC cup shank brushes for the straight grinder are suitable for machining hard-to-reach areas on workpieces made of steel. The tool supports you in demanding work such as removing paint and rust, cleaning welding seams, and for surface preparation and finishing of steel. Additionally, it can be used to efficiently perform deburring work, making Tyrolit's cup shank brush universal in a wide range of tasks. The SM version of the knotted DW brushes additionally prevents corrosion on the workpiece by using brassed steel wire.

Features

- + Universal tool with good brush life
- + Especially suitable for hard-to-reach places due to their shape
- + Brass-plated steel wire SM prevents corrosion

Applications

- + For removing rust, cleaning welding seams and for surface preparation and finishing of steel
